WHO WE ARE

Progress in every aspect is essential. To climb better, you need your elements to be better. This is where we get into the picture. We are climbers who are passionate about taking our performance to the next level. Faces Holds was born out of our ambition to develop best products for our local gyms and quickly spread nationwide. Let us proudly introduce you our customizable stock of plywood volumes.

WHAT WE DO

- >> For our products we prefer industry standart 18 mm birch plywood.
- >> We use quartz sand with particular grain size for consistent texture.
While providing a nice grip, your skin will not be worn out fast.
Thus you can climb as long as you want.
- >> For maximum longevity, our volumes are painted with waterproof epoxy paints. Upon request, custom texturizing and t-nuts are available.
- >> We place stainless steel washers to protect our volumes from screws, so you can use them longer.

WHAT YOU DO

After ordering your volumes there are some tips we would like to remind you.

- >> Use min. 4,5 mm screws and make sure you use all the fixing points so it is impossible to pull out a volume from the wall in any given situation. While doing this, do not overtighten the volumes.
- >> While cleaning with high pressure washers, obey our "40 rule". Maximum water temperature of 40°C and minimum distance of 40 cm. Don't use detergents and rough brushes to scrub.
- >> Don't leave your volumes under the sun for a long time.

Remember, we produce them with care, so you keep taking care of them.
